Working Student | 09/2022 - 08/2023

viadee AG, Münster, Germany

Enhanced Industry 4.0 processes using BPMN 2.0, machine learning, and process mining, delivering actionable insights and improving business efficiency through data analytics.

Software Developer | 10/2021 - 12/2021

zeb.information.technology GmbH & Co. KG, Münster, Germany

Improved document classification model accuracy from 50% to 83% using Support Vector Machines, gaining hands-on experience in Natural Language Processing.

Research Assistant | 03/2019 - 12/2023

University of Münster | European Research Center for Information Systems, Münster, Germany

Contributed to scientific research with focus on sustainability, sharing economy and machine learning through literature review and developed the frontend of a fitness app.

EDUCATION

Information Systems, M. Sc. - Current GPA 2.1 | 04/2022 - estimated graduation: 09/2025

University of Münster, Münster, Germany

Focused on business intelligence and networks. Developed canteen recommender system, automated document checks using machine learning, analyzed satellite images and social media, and designed an enterprise architecture.

Business Informatics, B. Sc. | 10/2018 - 03/2022

University of Münster, Münster, Germany

Focused on deep learning. Developed neural networks for tree detection and land usage in satellite images, led a front-end team for a public administration platform, and designed a digital business model.
